RANCHO BERNARDO TRAFFIC COMMITTEE
AGENDA FOR FEBRUARY 23, 2009 MEETING

You have received copies of the communications with the City's Deputy Director of the Transportation Engineering Operations Division.

We can now deal directly with that Division and receive a Traffic Request Number which will provide an approximate response date. This meeting will be geared to take advantage of this opportunity.

1) Compile a list of unresolved traffic issues.

2) Prioritize the list.

3) Establish procedure for transmitting the issues to the City's Transportation Engineering Operations Division.

Please let me know if there are other items that should be included in this meeting.
